Douglas Contour™ 105 Series Tray Packers and Shrink-Wrap Systems provide excellent product control at high speeds

Alexandria, Minnesota – April 24, 2007

The Douglas Contour™ 105 Series Tray Packers and Shrink-Wrap Systems use Slipstream™ HS pinless metering to accurately and quickly meter products at speeds to 105 cycles per minute.

Slipstream™ HS pinless metering incorporates patented technologies and electronic motion control to gently meter products at speeds 50% faster than traditional metering. The Slipstream™ HS pinless metering also eliminates product damage sometimes caused by pin metering, reducing operating costs.

The Contour™ 105 Series features include the Smartrak® Steady Stream Infeed to eliminate product bridging and remove the gaps that compromise pack pattern accuracy and continuous product flow. Patent-pending and patented tunnel technologies expertly manage heat and airflow, delivering tightly wrapped packages for maximum package integrity and appearance. A quick-change servo driven wrapping wand provides exceptional film control and accurate film placement.

The 105 Series easily handles a wide variety of product types and pack patterns and tray, pad, u-board, and film only packages on one machine without lengthy changeovers and few change parts, maximizing flexibility. Single or multiple lane production is available.

All Contour™ 105 Series Tray Packers and Shrink-Wrap Systems are backed by Douglas' exclusive 3-year limited warranty.

For more information, call 320.763.6587 or visit www.douglas-machine.com.

[About Douglas Machine Inc.](#)

Founded in 1964, Douglas Machine Inc. is recognized as a global leader in automated packaging solutions for paperboard, corrugated, and shrink-film. Today the company specializes in the design and manufacture of cartoners, sleeves, case and tray packers, and shrink-wrap systems. Customers from many different markets including food, beverage, personal care, and pharmaceutical, have come to rely on Douglas' automation expertise and value-added services to maximize their throughput. Based in Alexandria, Minnesota, Douglas Machine also has operations in Deerwood, Minnesota.
