New Film Cutter Improves Performance, Reduces Maintenance

ALEXANDRIA, MN. (May 9, 2019) - Douglas announces a new film cutter design for our Contour™ 80-Series and 105-Series shrink wrap machines. The new design increases operating tolerances, diminishing uncut film errors. Effects of uneven film tension/thickness and film delivery errors are minimized. The single nip roller design reduces maintenance while solidifying performance of film cutting and delivery.

About Douglas Machine Inc.

Founded in 1964, Douglas Machine Inc. (Douglas) is a global leader in automated secondary packaging solutions for paperboard, corrugated and shrink film. The company specializes in the design and manufacture of case & tray packers, shrink wrap systems, cartoners, sleeves, multipackers and palletizers. Based in Alexandria, Minnesota, Douglas is an employee-owned company that has installed more than 11,000 machines in 30 countries.
