

*Visit Douglas at Booth C-2014 to see how we provide **more**.
At Douglas, it's not just what we do. It's who we are.*

TOP LOAD ROBOTIC CASE PACKING

TriVex®

Put Douglas first on your My Show Planner and see how we can do **more** with the all **NEW** TriVex SL, launching at Pack Expo! The TriVex SL utilizes a robotic loader to pack bags, pouches and cartons in a standup configuration into retail-ready display cases with one or two product facings. Also on display is the vision guided TriVex RL. It incorporates a Delta III robotic loader, creating a highly efficient process while providing a small footprint.

Don't miss our
exclusive
product launch!

Contour SPS-60

SHRINK PACKAGING with Auto Changeover

Contour™

Make a point to check out what's new with the Douglas Contour SPS-60 shrink wrap system. You'll be glad you did. This system is equipped with our latest SmartSelect™ automatic changeover for multi-lane conveyors and infeed rails – providing you with **more** options. It incorporates Rockwell's linear motor technology to more efficiently group and meter bottles, cans and cartons.

HORIZONTAL CASE/TRAY PACKING

Axiom® IM and Invex® IM

It's definitely worth your time to see the Axiom IM and Invex IM in action. Watch how the Axiom IM provides gentle product handling at speeds up to 40 cases per minute with the pack-pattern flexibility your retailers demand. The Douglas Invex IM features speeds up to 25 cases or trays per minute, a simple and repeatable changeover, a sanitary frame design and stainless steel wash down options. See how these two meet your case/tray packing needs and **more**.
